recognition of said feature;
an intelligent controller having associated therewith a
means for accessing said programming material in
response to receiving said coded signal; and
a display unit for presenting said programming
material.

169. A system as defined in claim 168 wherein said at least one machine recognizable feature has associated therewith a data link which is recognized by said feature recognition unit.

170. A system as defined in claim 169 wherein said data link comprises an image data link.

171. A system as defined in claim 169 wherein said data link comprises a video data link.

172. A system as defined in claim 169 wherein said data link comprises a programming data link.

173. A system as defined in claim 169 wherein said data link

comprises a sound data link.

174. A system as defined in claim 169 wherein said data link comprises an online data link.

175. A system as defined in claim 169 wherein said data link comprises an online shopping data link.

176. A system as defined in claim 169 wherein said data link comprises a pictorial data link.

177. A system as defined in claim 169 wherein said data link comprises an electronic data link.

178. A system as defined in claim 169 wherein said data link comprises an electronic media link.

179. A system as defined in claim 169 wherein said data link comprises an "information superhighway" data link.

180. A system as defined in claim 179 wherein said "information

superhighway" data link comprises the internet.

181. A system as defined in claim 179 wherein said "information
superhighway" data link comprises the world wide web.

182. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a computer network.

183. A system as defined in claim 179 wherein said "information
superhighway" data link comprises an ISDN network.

184. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a telephone line.

185. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a CATV line.

186. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a local area network.

187. A system as defined in claim 179 wherein said "information

superhighway" data link comprises a wide area network.

188. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a data communications
network.

189. A system as defined in claim 179 wherein said "information
superhighway" data link comprises an Internet Product
Service Directory.

190. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a globally based digital
communications network.

191. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a wireless network link.

192. A system as defined in claim 179 wherein said "information
superhighway" data link comprises a Wireless Application
Protocol internet.

PATENT

193. A system as defined in claim 179 wherein said "information superhighway" data link comprises an ethernet network.
194. A system as defined in claim 179 wherein said "information superhighway" data link comprises a RF cellular network.
195. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a bar code.
196. A system as defined in claim 195 wherein said bar code comprises a Universal Product Code.
197. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises an invisible bar code.
198. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a magnetic code.
199. A system as defined in claim 168 wherein said at least one machine recognizable feature comprises a printed character.

239. A system as defined in claim 168 wherein said display unit comprises an Internet-enabled telephone.

240. A system as defined in claim 168 wherein said recognition unit is selected from a group consisting of a hand-held unit, a scanner, a bar code scanner, an optical code reader, an optical reader, a personal camera, a personal computer reader, a digital camera, a digital mouse and an optical mouse.

241. A system as defined in claim 240 wherein said recognition unit is linked to a personal computer.

242. A system as defined in claim 240 wherein said recognition unit is linked to a wireless interface.

243. A system as defined in claim 242 wherein said wireless interface comprises a wireless network.

244. A system as defined in claim 243 wherein said wireless network comprises a cellular network.

PATENT

251. A system as defined in claim 240 wherein said recognition unit is linked to a television set.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

252. A system as defined in claim 240 wherein said recognition unit comprises a portion of a cellular telephone.

253. A system as defined in claim 240 wherein said recognition unit comprises a portion of a personal digital assistant.

254. A system as defined in claim 240 wherein said recognition unit comprises a portion of a remote control unit.

255. A system as defined in claim 240 wherein said recognition unit comprises a portion of a handwriting implement.

256. A method of providing a user access to programming material, comprising the steps of:

imprinting a machine recognizable feature within an advertisement;

scanning said machine recognizable feature of said advertisement; and

transmitting data associated with said machine recognizable feature via a communication link to access said programming material, wherein said programming material is
